SUMMARY

Computer Engineer and full-stack developer from Nepal with hands-on experience building modern, interactive web applications using React, Next.js, Express.js, and Python, backed by solid grounding in SQL and MongoDB. Comfortable across the stack: clean, responsive UI/UX design, AI/ML-driven automation (NLP, prompting, lightweight model deployment), and shipping projects from concept to a live, deployed product. Also experienced in 3D web development with React Three Fiber and in designing brand and visual assets to support product work.

SKILLS

Frontend: React, Next.js, Angular, JSX, Tailwind CSS, HTML5, CSS3

Backend: Express.js, Node.js, Flask

Databases: MongoDB, MySQL, SQL

AI / ML & Automation: NLP (keyword extraction, semantic scoring), ML models (flan-t5-small), Python automation, AI prompting

UI/UX Design: Figma, Canva, custom themes, responsive design

Deployment & Hosting: Cloud platforms, CI/CD workflows

Programming Languages: JavaScript, TypeScript, Python, C++, SQL

PROJECTS

ResumeAI | Personal Project

Tech: React, Next.js, Tailwind CSS (+ Flask backend).

- Built an ATS-optimized resume tool that analyzes and scores resumes against job descriptions using NLP-based keyword extraction and semantic matching.
- Applied AI prompting and lightweight ML models to generate actionable resume improvement suggestions.

Nova DVR | Personal Project

Tech: React, Tailwind CSS (+ Node.js/Express backend).

- Developed a smart video downloader application that lets users capture and save online video content in a streamlined workflow.
- Focused on a clean, responsive interface and reliable handling of the download pipeline.

Divine Echoes | Personal Project

Tech: Next.js, React, Tailwind CSS (+ lightweight backend).

- Designed and built a creative web platform that merges spirituality with digital storytelling, combining custom UI/UX design with interactive, narrative-driven content.
- Owned branding and visual design for the project end-to-end, from concept to deployed site.

Phishing Simulation Tool | Personal Project

Tech: React, HTML5 (+ Flask backend).

- Built a security-awareness tool that simulates phishing campaigns and tracks user interactions (opens, clicks, submissions) for educational and training purposes.
- Generated interaction reports and follow-up feedback to help users recognize and avoid real phishing attempts.

EDUCATION

Bachelor of Engineering in Computer Engineering

Mar 2021 – Aug 2026

Cosmos College of Management & Technology, Sitapaila, Nepal

- Completed advanced coursework in AI and machine learning applications.

+2 Science

Jan 2019 – Dec 2020

Milestone International College, Nepal

- Achieved a top 10% ranking in national science examinations.
- Received an award for excellence in mathematics and physics coursework.

LANGUAGES

English: Proficient | **Nepali:** Advanced
